

INDUSTRIAL CLEANING SYSTEMS

VACUUM WASHING STATIONS

- Vacuum Solvent Cleaning Machine
- Vacuum Water based Cleaning Machine

Each VACUUM-CAST device is protected by patents
ref. 194638, 204670, 217042.

The washing stations are designed and manufactured according to individual customer needs.

The devices comply with European safety and environmental standards.

Precision-washing of various details, regardless of their geometry (blind boreholes) or of their material.

Characteristic:

- No need for additional special ventilation systems,
- The system is hermetically sealed – no emission of dangerous vapors
- Waste greatly condensed and reduced
- Repeatable quality of the process, thanks to the washing medium cleaning system (vacuum distillation),
- Programmable washing technology,
- High efficiency,
- Temporary anti-corrosive protection without an additional layer.

INDUSTRIAL CLEANING SYSTEMS

VACUUM WASHING STATIONS

- Vacuum Solvent Cleaning Machine
- Vacuum Water based Cleaning Machine

Additional equipment:

- Ultrasonics,
- "Tele-Service" program,
- "Weekend" program,
- Technological process data storage,
- Automatic loading and unloading system.

Application in the following industries:

- Automotive,
 - Aviation,
 - Military,
 - Machine,
 - Tools,
 - Electronics,
- and in many other industries.
